This time we will give you more plain text to work with you will probably find that having extra content that is ascii makes this one more solvable it would be solvable without that but we will make sure to give lots of text just to make sure that we can handle it wonder how much will be required let's put the magic phrase for the next level in the middle right here magic wand ok now more text to make sure that it is solvable I should probably just put in some nursery rhyme or something Mary had a little lamb little lamb little lamb Mary had a little lamb whose fleece was white as snow I don't want to make this harder than it needs to be if you've solved a lot of simply crypto challenges you probably already have the code and will breeze right through it if it helps most of the plaintext is static at each of the levels I'm not a masochist the funny thing is that depending on which random key you get that poem might be exactly the right offset to successful
